

SANTHOSH RACHA

Java Developer

☎ 8688092739 ✉ rachasanthosh2309@gmail.com 🌐 LinkedIn 📍 Hyderabad

SKILLS

Programming Languages : Java
Frameworks & Technologies : Spring Boot, Spring MVC, Spring Data JPA, Hibernate, RESTful APIs, Microservices
Databases : PostgreSQL, SQL Server
Cloud & Distributed Systems : Spring Cloud Gateway, Eureka, Spring Cloud Config, Apache Kafka
Security : Keycloak, OAuth2, JWT
Caching & Tools : Redis, Docker, Git, Postman
Testing : JUnit, Mockito

WORK EXPERIENCE

Java Developer | Full-time 2024 - 2026
Tata Consultancy Services On-site • Hyderabad

- Developed and maintained **RESTful APIs** using **Java and Spring Boot** for backend application features.
- Applied **Core Java and object-oriented programming concepts** while developing and maintaining application components.
- Worked with **SQL queries** for retrieving, inserting, updating, and deleting application data.
- Implemented **input validation and exception handling** to improve API reliability and handle invalid requests and application errors.
- Tested and validated REST APIs using **Postman**, troubleshooting API requests, responses, and database-related issues.
- Worked with **SQL Server** for relational database operations and application data management.

PROJECTS

AI powered Fitness App |  Github

- Developed microservices using Java and Spring Boot for user management, fitness activity tracking, and AI-powered insights, following a modular microservices architecture.
- Implemented **service discovery and** API routing using **Netflix Eureka Server** and **Spring Cloud Gateway**, enabling dynamic service-to-service communication and providing a single entry point for frontend/API clients.
- Integrated **Keycloak** for authentication and authorization, securing microservices using **OAuth2/JWT-based authentication** and managing user roles and access control.
- Used **PostgreSQL and MongoDB** based on service requirements — PostgreSQL for structured user data and MongoDB for activity/AI-related data, with Spring Data for database interactions.
- Implemented asynchronous communication using **Apache Kafka**, publishing fitness activity events from the Activity Service and consuming them in the AI Service for further processing without tightly coupling the services.
- Integrated **Google Gemini API** through a dedicated AI Service to generate AI-powered fitness insights from user activity data, with **Spring Cloud Config Server** used for centralized configuration management across services.

TinyURL |  Github

- Built a **URL shortening backend service** using Java and Spring Boot with RESTful APIs for URL creation and redirection.
- Implemented collision-resistant short-code generation and **HTTP redirects** for efficient URL resolution.
- Integrated **Redis caching** with an in-memory fallback to reduce database lookups for frequently accessed URLs.
- Implemented **API rate limiting**, input validation, and configurable URL expiration to improve application reliability and security.
- Developed an analytics module to capture **click counts, referral sources, and timestamps** for link-level traffic analysis.

EDUCATION

CVR College of Engineering | Hyderabad
B.Tech CSE

CGPA : 7.95
