

SANTHOSH RACHA

Java Developer

☎ 8688092739 ✉ rachasanthosh2309@gmail.com 🌐 LinkedIn 📍 Hyderabad

SKILLS

Frontend :	React, JavaScript, Tailwind CSS
Backend :	Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful APIs
Databases :	PostgreSQL, Redis
Tools :	Docker, Postman
Languages :	English, Telugu, Hindi

WORK EXPERIENCE

Java Developer | Full-time

2024 - 2026

Tata Consultancy Services

On-site • Hyderabad

- Developed scalable RESTful APIs using **Spring Boot**, following clean architecture principles, and secured endpoints with Spring Security using JWT-based authentication and role-based authorization.
- Utilized Spring Data **JPA** and **Hibernate** ORM to design efficient entity mappings and repository layers, reducing boilerplate code and ensuring data consistency across modules.
- Integrated **Redis** as a caching layer to optimize frequently accessed data and reduce latency, while contributing to a microservices-based architecture involving individual services and inter-service communication.
- Ensured application scalability, performance, and reliability under high-volume load, implementing robust exception handling and validation, and applied AI prompt engineering techniques to accelerate development and debugging.

PROJECTS

Microservices eCommerce

- Architected and developed a microservices-based e-commerce platform using Spring Boot, decomposing core functionalities (product catalog, cart, orders, and user management) into independently deployable services with RESTful inter-service communication.
- Containerised all microservices using Docker, streamlining local development and deployment workflows, and integrated **PostgreSQL** as the primary datastore with **Spring Data JPA** for reliable, transaction-safe data persistence.
- Collaborated on service-to-service integration and API design across the platform, ensuring consistent error handling, request validation, and clean separation of concerns across independently scalable modules.

URL Shortener

- Built a scalable URL shortening service using Spring Boot, generating collision-resistant short codes and implementing HTTP 302 redirects for efficient URL resolution.
- Implemented **Redis** caching with an in-memory fallback for frequently accessed URL mappings, reducing database lookups and improving redirect response latency.
- Implemented request **rate limiting**, input validation, and configurable link expiration to protect APIs from abuse and ensure reliable URL lifecycle management.
- Designed an **analytics** module to capture click counts, referral sources, and timestamps, enabling link-level traffic analysis and engagement tracking.

EDUCATION

CVR College of Engineering | Hyderabad

CGPA : 7.95

B.Tech CSE

Narayana Junior College | Hyderabad

CGPA : 98%

Intermediate
